DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 17-80, drawn to a semiconductor memory device or a signal transmission system for a semiconductor memory device, classified in class 711, subclass 1.
 - II. Claims 81-100, drawn to a receiver circuit, classified in class 375, subclass 318.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated to each other because Group I is directly related to a semiconductor memory device comprising a plurality of switchable signal transmission lines organized in a hierarchical structure, at least one target unit for reading data connected to the transmission lines, a readout circuit for eliminating intersymbol interference (ISI) component, and an ISI component elimination circuit for reducing noise between the transmission lines. However, Group II is directly related to a receiver circuit comprising a differential amplifier and an amplifier precharge circuit for changing the value of capacitance for periods of n bits before and after switching from a first transmission line to a second transmission line.

Art Unit: 2637

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Gerald Oram on 24 August 2004, however, no provisional election was made. Affirmation of this election must be made by applicant in replying to this Office action. Applicants are suggested to elect Group II (claims 81-100) since Group II is related to the art in group art unit 2637, Wherein Group I (claims 17-80) is related to the art in group art unit 2186.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
